

# mineral fusion™

CLEAN ▶ NATURAL ▶ BEAUTY

For this season's makeup review, makeup artist/stylist Carrie Von Loudon of the Artistry Co. joined makeup lovers on the Express-News staff to test a number of eye, cheek and lip products to see which worked best for trends this fall. During an almost two-hour, noontime break, we tried a dizzying array of products from MAC, Bobbi Brown, Le Métier de Beauté (new at Neiman Marcus), Sephora, The Body Shop, Benefit, DuWop, NYC, Laura Mercier, Mineral Fusion, Sally Hansen, Essie, Lippmann Collection, Iman, Mark and three collections from Target: Pixi by Petra, JK (Jemma Kidd) and NP Set. A grueling task ... OK, we spent some of the time giggling in delight ... but we found some great products to add to your makeup collection while creating the four hottest trends for this fall: the nude face, the bold "Lolita" lip, berry-licious tones and the smoky eye.

## Makeup trends from natural to bold can give you a look that pops!

**Mineral Fusion's** eco-friendly **Eyeshadow Trio** in **Stunning**, provides a nice neutral palette. The shadows go on light and smooth. They are light enough that you could wear a darker lip color.
